

Overview of Pre-Engineered Wood Trusses from Plans Review to Inspection

DATE: Tuesday, October 8th, 2013 TIME: 1:40 pm

LOCATION: Chedoke C

GUEST SPEAKERS: Mr. Maged Mikhail - Town of Halton Hills

DESCRIPTION: Maged Mikhail, P.Eng. Town of Halton Hills - Pre-Engineered Wood Trusses are widely used in residential, institutional, commercial and agricultural construction; nonetheless, building officials are frequently confronted with numerous challenges during the plans review and inspection of such roof systems. In a practical approach, the speaker will highlight critical spots in the plans review and inspection processes by addressing five major areas: Design; Manufacturing; Installation; Overall building; Applications.

BIOGRAPHY: Mr. Maged Mikhail, Building Engineer
Maged Mikhail, P.Eng, is a Building Engineer with the Town of Halton Hills. He is a building official with years of former experience as structure engineer and software developer in the fields of Wood Trusses and Structural Wood Products.
