

Inspection Orders under the Fire Protection and Prevention Act

DATE: Wednesday, October 7th, 2015 TIME: 8:30 am

LOCATION: Sheraton C

GUEST SPEAKERS: Ms Susan Clarke - Office of the Fire Marshal

DESCRIPTION: Susan Clarke, Susan Clarke, P.Eng., MBA - Fire Protection Engineer, Office of the Fire Marshal & Emergency Management - Forensic Services and Coroner's Complex: Most municipal fire departments now issue Inspection Orders to address Fire Code violations and other fire safety issues. The growth of these in the past five years has skyrocketed and will have a tremendous impact on building departments.

This presentation will review Inspection Orders issued under the Section 21.(1) of the Fire Protection and Prevention Act - the various types of Orders, and the limitations with respect to the Building Code Act. As many of these will require construction, and therefore building permits, the role of municipal building and fire officials in plan review and inspections will be addressed. Several case studies will be presented as examples of the process.
