

Aduvo Systems Screw Piles

DATE: Tuesday, October 3rd, 2017 TIME: 1:40 pm

LOCATION: Lawren Harris Room

GUEST SPEAKERS: Mr. Mickey Chaytor - Aduvo, Mr. Luis Gomez - Aduvo

DESCRIPTION: Mickey Chaytor, CEO - Aduvo | Introduction to Ground Screw/Pile Foundations by Aduvo Systems Limited.

The Ground Screw is modern technology that has revolutionized foundation construction. A giant screw that screws into any soil type with a variety of applications on the head of the screw for any project requiring a foundation. Ground Screws are versatile and suitable for every need and are used as a stable and highly resistant foundation in all bearing soil types. An extremely firm hold is guaranteed through lateral compression of the earth and the resulting compaction.

BIOGRAPHY: Mr. Mickey Chaytor, CEO - Founder of Aduvo Systems Ltd.

St Catharines Native and Peel Region Police Officer, Mickey Chaytor had a vision to bring thriving European technology in foundation construction to North America. In 2013, those dreams were realized with the birth of Aduvo. Aduvo brings alternative foundation solutions to the mainstream construction market. Through a proven installation track record, an innovative team of professionals and cutting edge German engineered technology, we are uniquely positioned to change the foundations landscape in North America.

As the prominent North American Installer of Krinner Ground Screws, our team has installed over 100,000 screws in a wide array of soil conditions, along with innovative applications. Whether the foundation requirements are straightforward or challenging, our teams on the ground deliver an always on time and specification install.
