

Geotechnical Concerns during Construction

Moderator(s): Shannon Vanderydt

DATE: Wednesday, October 2nd, 2024 TIME: 8:30 am

LOCATION: Salon D,D1

GUEST SPEAKERS: Montana Wilson - Grit Engineering Inc.

DESCRIPTION: Building on a Firm Foundation is important. Let Montana walk you through what to look for on site to ensure your inspections start off solid.

BIOGRAPHY: Montana Wilson

Montana Wilson is a highly skilled professional with a broad and impressive career in engineering. She embarked on her path by earning a bachelor's degree in Civil Engineering from Queen's University, followed by a master's degree in the same field from the University of Western Ontario. Furthermore, she has an Executive MBA from the University of Fredericton.

Montana has been a licensed Professional Engineer in Ontario since 2011 and is also a Designated Consulting Engineer. Her experience covers various sectors, including municipal, residential, commercial, industrial, and agricultural projects. Recently, in 2021, she founded GRIT Engineering Inc. in Stratford, Ontario—a small firm that provides civil, environmental, surveying, and geotechnical services.

Montana is currently on the Board of ACEC-ON and President of the Perth Huron Builders Association.
