

Piecing Together Backflow Prevention in Ontario

Moderator(s): Andy Jones

DATE: Tuesday, October 6th, 2015 TIME: 1:40 pm

LOCATION: Grand Ballroom West

GUEST SPEAKERS: Mr. Cameron Gray

DESCRIPTION: Cameron Gray, Operations Manager at ProActive Water Solutions Inc.: Working in the field of cross connection control and backflow prevention in Ontario can be confusing due to the different regulations/bylaws in every municipality. This seminar will attempt to provide insight into the field by discussing:

- Basic backflow/cross connection control theory and terms;
- Municipal bylaws;
- Bylaw, building code and CSA requirements.

BIOGRAPHY: Mr. Cameron Gray

With over 13 years of experience, the past 8 years specializing in backflow prevention, Cameron is a licensed Plumber with the Ontario College of Trades, a licensed Master Plumber with the city of Toronto and a licensed Cross Connection Control Specialist with the Ontario Water Works Association.

In his current role as Operations Manager at ProActive Water Solutions, he has been involved in the installation of more than 500 backflow prevention devices, the testing and repairs of devices and has performed cross connection control surveys in over 300 facilities across the province. He has extensive experience working with water systems in all types of buildings and he has worked in over 300 cities, towns, counties and hamlets from Kenora to Leamington and from Windsor to Cornwall.

Cameron's experience allowed him to serve as President of the Ontario Backflow Prevention Association from 2012-2014 where he represented his colleagues at the provincial and national level, including participation in the American Backflow Prevention Association.

Cameron is dedicated to ongoing public education about water protection issues and presents frequently at trade shows, conferences and information sessions.
